DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hart.

Re claims 1-13, Hart discloses a brake system for a railway vehicle having at least two bogies comprising: a main air reservoir line (120) fed by a compressed-air generating device, a compressed-air line connecting the main air reservoir line to pneumatic brake units (127) and auxiliary pneumatic units on each bogie; a central control unit (130) controlling the pneumatic brake units and the auxiliary units by local electronic brake control units (133), which are mutually connected by a common braking data bus; and the local electronic brake control units being in the bogie or on a car body in the area of the bogie.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Doto et al., Larson, Jr. Et al., and Gebhardt et al. teach brake systems for railway vehicles.
